

# INDIVIDUAL ROLLER TRACK APPLICATIONS

---

ROUNDING OUT THE SUNGAL LINE OF ROLLER SHELVES

CREATED TO REDUCE COSTS OF ROLLER SHELVING FOR MULTI-PAKS

# SITUATION ANALYSIS

---

Retailers, would like to install roller shelves for beer, seltzer and other products in multi-pak packages. But the concern has always been cost. Full roller shelves are necessary for single serve bottles, but they represent 14 roller tracks for a standard 30" wide shelf/door.

# SITUATION SOLUTION

Now, you don't need 14 roller tracks for your 30" wide doors for multi-pak (MP) packages. With only 2 tracks per package, you can merchandise most any MP package. Except for 24 or 30 paks, only 2 roller tracks are need for most all packages in your alcoholic beverage section.

# SITUATION SOLUTION

---

Here is a 30" section on our new NexGen French door shelving unit. This illustrates the new System on the shelf above the G4-T Roller Shelf. While the G4-T covers the entire width with rollers, the System is relatively see-through as all MP's utilize only 2 Roller Tracks per package.

# SIMPLE SOLUTION

System is designed for simplicity with only two new parts to add to your Sungal Roller Shelving inventory:

- 1. Roller Tracks
- 2. Front and rear channels (identical)

The front product stops and the dividers are the same as the standard G-4T Roller Shelves

Slots for dividers and channel for front product stop

# SIMPLE SOLUTION

---

System is designed for simplicity. Here are the two unique parts of the system. The top image is the front and/or rear channels that accept the roller tracks, dividers and front product stops.

The bottom image is the Roller Tracks that snap into the front/rear channels and can be placed anywhere on the channel for any package.

The front product stops and the dividers are the same as the standard G4-T Roller Shelves

# SYSTEM FLEXIBILITY

---

Move up to the Next Generation of Roller Shelving. Tracks can be moved anywhere on the front and rear channels to accommodate any multi-pak package. System can be used on any type of shelving, from walk-in cooler shelving to beer cave shelves to gondolas.
